

Vaishnavi interview

- * She gave a brief description on her previous meeting
- * Meeting went on for 2 hours
- * Team very collaborative
- * They seem to work on the same activity which are pre-planned.

* Members do not work separately

* A: why discord?

V: Since everyone has discord &

that most of Vaishnavi's collaboration of other tasks/proj are in discord.

* A: last time we saw you using google docs / forms, screen sharing. how does it help

V: he says having one place for everything makes things easier.

Sharescreen -> better than google doc -
Redundant pointers

* Qualities?

googleforms easier, while Plato → heavier

V - Says confidently its terrible & seems to be redundant

Am: Says she will move on to meeting dynamics

V - asks to repeat

A - How much time you would spend on meetings

V - Not sure, heavily depends on meeting

last week? thinks → 4 to 5 hours

She says not sure & checks her calendar & confirms.

V → classifies what is a collaborative meeting?

~~A~~ → . Says last week was very weird - less collab

V → she says she uses facehime with a friend & google docs instead of zoom → fatigue.

light weight → facehime / whatsapp - friendly chat

discord with another person → zoom pinned

ID pinned to discord. (6-7 hrs in meeting)

usually 2-3 hrs.

V → meety with Club → PriPhaly face home
Very doubtfully

→ then moved onto discord

V → Constraints with discord (little ^{exaggerate} tired)

Listening to spotify & not respond

"Crime "

Online "

Camera on?

V → no, usually its not a problem

She says she don't mind, & says

there are times where it would be a
awkward silence.

* good quality call without video

* personal chat → video ✓

* online better → very strongly / confidently

Why online → collaborate better

Execution time shorter

easy access to eqt resources

Inclusion.

Imperson → not everybody would have
same resources

Zoom → You can't talk → you can put it
on chat. (eqt resource)

v - good start

A → asks abt an incident

v → Thinks for some time & says abt a course in last term.

- There was a disturbance (traffic/vehicle sound) through window).

- As she answers, there was a background noise.

- undugpad → ~~does~~ has so many things to do.

→ doesn't give so much concentration
